NATURAL GAS MEETING FAVORABLE

The public meeting held last Friday evening to discuss the proposed agreement between the Council and Mr. Dingman for drilling at Gleichen for natural gas was well attended by the residents and a deep interest manifested. After the formal opening Secretary Johnston read the agreement over, whereafter Mr. Dingman requested the ratification of the agreement and suggested any changes they thought were necessary in the agreement. Several thereupon took the opportunity to ask a number of questions, which were answered with explanations by the councillors and Mr. Dingman.

Mr. Lafferty was asked by a representative to address the meeting, but that gentleman declined, stating he enjoyed no such right as he was not a ratifier, unless it was desired that he speak as an auditor. After a brief consultation the councillors requested Mr. Lafferty to consider the agreement on their behalf, who in compliance read the entire document over clause by clause, explaining each one, criticizing them and advising a number of alterations. To all of them Mr. Dingman assented save the reduction of time in which the contract was to be allowed to start drilling operations. Mr. Lafferty thought six months ample time, but Mr. Dingman was willing to wait one year from the date of the signing of the agreement to place from the time of necessary legislation may be obtained. He explained at Calgary five and six months was not long enough and he had to pay for an extension of time. For a time it appeared that there would be deadlock on this point, but after discussing the general expression of the councillors intimated their willingness to accept Mr. Dingman's terms.

The meeting then requested that Mr. Dingman and Mr. Lafferty make the change in the agreement the following morning and the Council meet to approve of them if they deemed it wise. This was done accordingly and the secretary is now obtaining the signatures of the ratifiers to a petition addressed to the Legislature tomorrow. When the petition has been signed by two-thirds of the ratifiers the agreement will be signed by the Council and Mr. Dingman when the latter states he will assent to the ratification of the agreement.

Imported More Clydes

The following reference to the horses brought from Scotland last week by John Clark, Jr., is from the Canadian Courier, Anytown, Scotland, and goes to show the fine stock of his late importation.

"Mr. John Clark of Crawford, Alberta, has spent the winter in his native Kintyre, called for the West again on the 17th ult., by the Allan Line, taking with him three stallions and four mares, all purchased in Scotland. These are Taylor, Parkman, and Taylor. They are capital lots of good colors and first rate breeding. He'll stamp (1854) a four-year-old horse, one lot of Clydesdales, and a few more. He'll be a fine horse, and was bred by the late Mr. J. M. Hall of Kilmarnock. The two-year-old horse of the name 'Lafayette' was bred by Mr. T. B. Barry, Bigger, and got by the grand horse Royal Time out of a mare by Prince Victor. The other lots, including the mare 'Lafayette' (1860), is a beautiful horse, and was bred by the late Lord Dundee and his dam by William the Conqueror, a noted son of Prince of Wales, and the exception of Calverton (2009), a

Empire Day Sports a Success

Good Sports and Every Person Well Satisfied

A half-mile match race was run Tuesday evening at the race track between 'Leggy' and the 'Indian' (Lafayette). There was trouble getting a start and Little Mack got away to a good advantage with cries of 'no start', but before he got quarter the distance Chery was passing him and Laure Brant for the leading. At this point Little Mack left the track and in an effort to jump the wire fence caught his hind foot and fell, giving Kenneth McPhee a nasty fall on the ground. A couple of women who were close by went to his aid and Dr. Farquharson was soon in attendance, who announced that the injuries were not serious, though his arm was badly swollen, from which he suffered considerable pain, but he is walking about the town freely. The other horse continued on with Chery leading and at the end of the mile was made for the home stretch when he left the track and Laure Brant was the only horse to finish the race and ended the winner.

As an evidence of the interest the citizens of Gleichen, as well as of the towns within a radius of one hundred miles of the city, are taking in the Alberta Provincial Exhibition, and the success in the distribution of the business from the exhibition, the manager received no less than 76 letters in one morning's mail, asking for a total of forty-five thousand pamphlets, advertising the exhibition. These were to reply to a letter sent out from the Exhibition Company asking for cooperation of the business houses in the distribution of reading matter of general interest in connection with the exhibition, and the result is very gratifying indeed. It is expected that an edition of fifty to seventy-five thousand copies of this pamphlet will be issued, and as the manager has been unable to communicate directly with everyone who might be willing to assist in mailing them to interested parties, he would be very glad to supply as many as would be required to those who apply. It might also be mentioned in this connection that the merchants of Calgary are using up orders of two hundred thousand exhibition envelopes.

Fredrick Botkiewicz, a young man of about 30 years, who arrived with two horses from Michigan a couple of weeks ago in search of land dropped dead Wednesday afternoon in his room in the block from heart trouble. He had not been well for a few days and Dr. Farquharson called to visit him and found him dead upon the floor. The deceased leaves a wife and child in Michigan and one of his brothers is leaving this afternoon for his home with the remains.

The other day H. Scott of Bushart remarked again, 'No crop conditions are better now than they were ever were in the history of the year. These were the best years in the history of the year. I have spring wheat on almost four inches and I never saw grain grow so fast. We have all had bad rain in this month, but never so great before. We should harvest some more crop next fall if the weather continues so favorable.' Mr. Scott is one of our old settlers who is cheerfully giving up ranching for farming.

A couple of foremen working on the section at Bassano were arrested there last week by Sergt. McGraw for stealing from a train. They were taken to Calgary to await their trial.

The Call to the end of the year 81.

The Empire Day races and sports proved a decided success and everyone went home well pleased with the day's action. Although up to the last moment it appeared Pluvia was determined to spoil everything.

Starting Friday evening the rain fell almost incessantly until Sunday evening, the streets and roads were in a frightful condition and the prospects for the 24th were dimmed indeed. But in the evening, the wind began to blow the clouds away and morning dawned on dry, but cloudy weather, with old Sol occasionally peaking through. Then it was that the peculiar feature of the soil of this country has of becoming dry very quickly on the surface was appreciated, and knowing this the people of the surrounding country began to arrive in goodly numbers. The condition of the new track was naturally a question of moment, but the persistent efforts of the committee in charge proved to be most efficient and the course, while somewhat heavy, was nevertheless in a very satisfactory condition, and the general verdict of all who should know was given that the track would eventually be a fast and good one. The football game which was to have been played in the morning was finally postponed to a future date, and the baseball game postponed until evening.

In the afternoon the Gleichen District Agricultural Association's grounds presented a gay appearance and despite the unpromising weather conditions it is estimated that between 600 and 700 people were on the grounds that afternoon. And it was with no little pleasure the directors listened to the many compliments of the crowd upon the improvements they had effected in the grounds, comprising of fences, grandstands and track in so short a time.

All of the events on the program were watched with keen interest by the spectators and on some considerable money changed hands, the whole affair passing off very nicely and with no friction.

To Judge Daughd much credit is due for his fair and impartial decisions, and not once was his decisions disputed, which also speaks well for the class of sporting men on the field, for it is much more credit to a man to accept a defeat gracefully than a victory.

Dr. Holme and Leonard H. Poe made excellent starters, and gave entire satisfaction, and it was seldom indeed that any time in getting the horses off to a good start.

Secretary Gray has kindly supplied the following result of the races and the time:

Quarter Mile Pony, 14.2 and Young's Grey and Young's Grey and Young's Grey, 2nd, competing with Wm. J. Siskana, H. McKie's Chery and Gray's Chery. Time 0.42.
Relay one mile—Miller's Skipper and Meteor 1st and Roy Allen's Dick and Prince 2nd, with McCutcheon's Indian and Barney. 3.18.
Half mile—Young's Jim 1st and West's Wattle 2nd, with Grey's Chery. 1.05.

Indian half-mile—Buck Running Rabbit's Laura, Brant 1st and Turned Up Now's Grey 2nd, with Little Axe's Silver Tail, Ray Eater's Charlie, Hindtoll's Whiteface and Woolfson's Black. 1.10
Pony half mile—Little Mack 1st and Ping Pony 2nd, with Dick and Chery.
Jumping contest—Miller's Skipper 1st, Young's Jim 2nd, with West's Sportman. 5.6

One mile—Jim 1st and Skipper 2nd, with Meteor. 2.8
Matched quarter mile—J. B. Leggat's Little Mack won easily from W. H. James' Siskana.

Cowley-J. J. Barry's Ninestop 1st and J. Dake's 2nd, with D. C. Wishart's Paddy and McCutcheon's Barney.
Indian one mile—Turned Up Now's Grey 1st and Buck Running Rabbit's Laura Brant 2nd. 2.15.

In the half mile 'Jim' and 'Wattle' made a very close finish, the former winning by only about a nose. In all the other races there were no close finishes, but nevertheless all were interestingly contested, and displayed in several match races being arranged for. The enthusiasm and enthusiasm makes it very evident that the races in future will be keenly contested.

It is pleasing to note that the Association will start up a profit of over \$175 to the good as a result of the gate receipts, grandstand fees, etc., which encourages them to continue the improvement of the grounds. The only accident of the day was in the first race, when Walter James was thrown off 'Siskana' by the horse stopping in a small hole and turning over a couple of hundred yards from the finish. Neither horse or rider appeared any the worse for the tumble.

Master Kenneth McPhee rode in nearly all of the races and proved really the best jockey on the field, and rode his mounts well, although Walter James also done very well and deserves encouragement.

Engineers Win By Two Runs

Before the horse races had ended the baseball game between the engineers and Gleichen began inside the ring and attracted a large portion of the crowd. The game was a good one and was watched with keen interest, the fans being very much excited at times. Both teams were short of men and had to supplement others whom they picked up on the field, but altogether they were pretty evenly matched. The boys from the engineers camp appeared to have the better team up to the fifth innings and it was not until the last two innings that the home team scored enough to make the betting anything like attractive and even then the odds were with the visitors. During the last innings, however, the game got rather exciting and for a time it was thought would finish in a tie. The game proved conclusively that the home team was the better team and with practice and a fast game may be expected when they meet again, which will not be for some time.

The line up and score was as follows:

In the evening the Grand Chautauk Centre provided entertainment in the Foresters' Hall, which was well patronized and a goodly amount added to the funds of the gymnasium.

The program was supplied by local talent entirely and had a number of very good features, but anything like a fair report of the contest is beyond our space this issue and will have to be left over.

The concert was followed by a very pleasant dance that taxed the hall to its utmost, and was kept up until about 3 a. m.

Monday a man named Bolt. Conway was shot by a section man at Chery and it is feared he will lose his leg. It is said that Conway is a hobo, who was tramping through Calgary, who insisted on forcing himself into the section house. He was warned to go away, but persisted in his attempt to break in, whereupon the section man shot him with a rifle, the bullet striking him in the thigh and going down to the calf of the leg. Conway was taken to Calgary and is now in the hospital and placed in the general hospital, where he now is under the care of physicians.

Dr. Sherre returned on Saturday from a trip to New York and other eastern cities, where he went last summer. He will only remain a short while in town on his returning locomotive. The doctor was somewhat surprised and pleased to note the growth of Gleichen during the summer.

The Natural Gas Industry

A factor of great importance in connection with the development
of the natural resources of the province from this time forward will un-
questionably be the natural gas industry.

On the continent, as a whole, the development of this industry
has gone forward with leaps and bounds and it takes precedence over
the production of most of the precious metals, ranking well up with such
basic products as coal and iron. In the United States for 1907 the total
value of the natural gas production was something like \$53,000,000; in
1908 it was over \$60,000,000. In Canada, the production, as yet has
been largely confined to the Province of Ontario. Last year the pro-
duction in commercial value was close on to a million dollars, beating
the value of petroleum by nearly \$300,000. In the United States where
at one time it was supposed that natural gas was only to be found in
Pennsylvania and West Virginia, gas in commercial value—a prac-
tically utilized form—is being obtained in Alabama, California, Colorado,
Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Missouri,
Montana, New York, Ohio, Oklahoma, Oregon, Dakota, Texas, Utah,
Washington, Wyoming and still the exploitation of the new territory goes
on; and the installation of a transmission pipe line to carry natural gas
for fuel, light and power purposes for any distances up to four or five
hundred miles and costing anywhere from \$5,000,000 to \$10,000,000
is limited only by the question of supply and demand. Natural gas is
more flexible and less limited by conditions than any other natural form
or element. In its adaptability to the requirements of our modern life,
and is therefore the most ideal of all of our fuel factors.

The strange things that one wonders at as such an ideal force,
so easily adaptable to our ordinary requirements, should not have been
utilized and conserved from the beginning, as were coal and iron and
other valuable products. Even the more recent development and pro-
duction of petroleum did not appear to suggest to those who had been
making multimillions through its utilization, the wonderful value and
utility of the allied product, natural gas; and the years of waste and
dissipation of this valuable product, means that untold millions have
been literally thrown away and forever lost through the want of and the
exercise of ordinary business intelligence and discretion.

Public attention has at last been called to this extraordinary con-
dition, and steps have been inaugurated upon the part of the various
governments of the United States, Canada and Mexico to conserve this
with other natural resources before the depletion has gone much further.

The best geological data gives promise that the Province of Alberta
is exceptionally rich in this respect, and is likely to become one of the
greatest natural gas producing areas—with a strong probability of an
immense petroleum development and production—to be found on the con-
tinent. As yet the industry is but an infant in the province, but condi-
tions point to phenomenally rapid and successful growth, and the time
must be very short, when, we are made to realize its great importance,
its great possibilities and its great utility in the advancement of a gen-
eral welfare of the people of the province. While its development and
use should not be restricted but should be encouraged in all legitimate
ways by the government, at the same time proper steps should be taken
to conserve this great wealth given asset, so that as little waste as possible
shall ensue through its utilization.

Gleichen Fair August 19th and 20th.

The Alberta Provincial Exhibition, July 5th to 10th, at Calgary.
In all your letters don't forget to mention the date at least of the
Gleichen Fair. It will help.

By the meeting Friday evening it is very evident the citizens of
Gleichen recognize a good thing when it comes their way and will vote
to encourage Mr. Dugan in his proposition to drill for natural gas
here. The agreement as amended appears to be very fair for all con-
cerned and may be expected to pass with very little, if any, opposition.

The Australian editors touring Canada were banqueted at Calgary
by the mayor and now it is said they are writing home to the antipodes
that Calgary has no newspapers as Calgary editors were not invited to
the banquet. Mayor Jamieson now says he "overlooked the newspaper
men entirely." That is surely rubbing it in with a vengeance. The
Calgary editors could rustle a beefsteak and let the banquet go without
much worry, but to be overlooked entirely by his worship is simply
well-awful. No doubt the Calgary editors will "heap coals of fire"
upon his worship's head by never "overlooking" him entirely.

According to a canvass made in Toronto, 99 per cent of the peo-
ple in that city are church members. That is surprising. There are 99
that safely lay in the shelter of the fold, and only one in the hundred is
out upon the hills. Yet notwithstanding that, the city of Toronto has
its slums, its saloons, its professions. Toronto seems to be no better than
its neighbors, though it has never yet been known to go so far as to ad-
mit that. With a church so strong as that, one would believe that there
would be a city without crime or police courts or vice or viciousness
of any kind, says the Albertan. The fault is not with the church, ex-
cept, perhaps, that the church is none too careful of the people it admits into
its fellowship. There may be 99 per cent of professing Christians in
Toronto, but not 99 per cent seem to be worthy of their church mem-
bership or the city would be set apart, an example to the world, which
it is not.

LAND SEEKERS
 are coming in very fast and
 the best land will soon be
 picked up.
 I still have a number of
 choice properties in land in
 the vicinity of Gleichen
 which I am selling at ex-
 tremely low prices, but now
 and then I get a letter raising
 the price of land listed, so
 any person wishing to buy
 will find it to their advantage
 to be very quick in closing
 deals.

320 acres, near Gleichen, at \$18 per acre
 very choice land.
 140 acres, near Gleichen, at \$20 per acre
 all irrigable.
 480 a. w. south of Bow River, at \$10 per
 acre, improved.
 640 acres, south of River, at \$12 per
 acre, improved.
 480 acres, south of River, at \$16 per
 acre, well improved.

McKIE & KILCUP
 Money to Loan
 On Improved Farm Property
 GLEICHEN, ALTA.

Hobbs are numerous along the railway
 at present and some are very bold. In
 town a few have been troubling the
 law-abiding people.

Geo. W. Evans, the undertaker,
 carries in stock at Gleichen a complete
 stock of undertaking goods, including
 coffins, caskets, suits, dresses, etc.

The Call is now prepared to supply
 all sizes and rollings for loose leaf ledg-
 ers to fit any binders at Toronto or
 Montreal prices.

Mary—How would you like to spend
 eternally with young Roger?
 Alice—I did. He called last night.

Some men are cruel, and some have
 good digestion.

 Calgary's Leading
 Merchant Tailor,
 8 Doors East of Royal Hotel

My Friday Bargain Day
 I'll sell you all on Friday next
 Three pencils for a dime,
 A watch I'll sell at that same price,
 If you do not care for time,
 Three writing Pens for 25, two Pencils for the same
 And envelopes I'll let you have at any price you name.
 Drop in and see my note Books, they are good at 50c each,
 Or a Stamp Book at 75c that surely is a peach.
 I'll sell you Oil and Varnish or Paint and Turpentine
 At prices that will make you think
 I've been drinking wine.
 I'll sell you Pins and Brooches and rings to make you smile;
 For prices I will surely have 'T. Eaton best a mile.
 Drop in and see me anyway, for it will pay you well,
 And the price don't make you buy.
 Then you can go to Halifax.

HARDWARE and FURNITURE

TOWN AND DISTRICT

The Call to Des. at 81.
 Gleichen Fair Aug. 19 and 20.

The Campbells are coming for tonight.
 For custom tailoring see W.H. Barry.
 Born at Gleichen, on May 21st to Mr.
 and Mrs. Alfred, a son.

The muscigles are showing up and
 promise a beautiful crop.

Born at Gleichen on Wednesday May
 28th, to Mr. and Mrs. Spurr, a son.

The Calgary and Edmonton papers
 speak very highly of the Campbell en-
 tertainers.

Clothes don't make the man, but a
 suit made by H. F. Barry will go a long way
 in that direction.

It is time a sidewalk was built to the
 Foresters' hall as all who attended the
 dance Monday night are aware.

Frank and Jennie Campbell, highly
 highly respected citizens, appear in the
 Gleichen's path tonight—Tuesday.

Wm. Hill brought in 300 head of young
 cattle last week from 30-manual, head
 and drove them to his ranch in the
 Glade Hills.

The Gleichen Evening News is getting
 ahead of the trade by reaching Gleichen
 at 5 o'clock each afternoon, and it is all
 the same surprise.

Mr. Ryan & Fair shipped in from
 Manitoba last week 1,000 head of young
 stock, and they have been driven out to
 the Two-Bar ranch.

A post office had been opened south of
 town to be known as Arrowood Creek
 post office, and the mail leaves Gleichen
 every Friday.

B. F. Barry has opened a tailor shop
 in the Congress Block, where he is pre-
 pared to do up to date custom tailoring
 and will carry a select stock.

The engineers from the S. A. L. C.
 annual proved a gentlemanly lot of base-
 ball players and will ever be welcome in
 Gleichen. They also to secure for the
 Dominion day celebration.

The Campbell entertainment tonight
 will be good.

The first four stores in the new block
 being built by the Gleichen Trading Co.
 on Cowfoot street are now well under
 way. The roof already completed and
 it will not be long before they will be
 occupied.

On and after May 15th the office of
 Short, Ross, Neilson & Howie will be
 open on Friday afternoon and Saturday
 morning.

A brakeman was killed at Beseno on
 Sunday, but as usual little information
 can be obtained concerning the accident.
 It is learned, however, he was climbing
 up between two freight cars when he
 slipped and fell on the track, and the
 wheels passed over his chest, cutting
 him in two. His name cannot be heard
 but it is stated that he was running
 on this train as an extra brakeman.

Some of the ladies, who for the first
 time in their lives saw a boxing contest
 Monday evening, have expressed them-
 selves as very much pleased with it and
 some do not hesitate to say it was the
 best item on the program. A few
 men have since stated they would
 like their boys to learn the art of defense
 as they saw that it was like all other
 things, good if not carried too far.

The Call in a short time will have the
 date at which all subscribers are paid
 on the ladies with each issue. This
 will prove a convenience to the subscrib-
 ers and if any mistake occur we will be
 pleased to correct them at any time.
 Already several hundred have the date
 and we would like it as a kindness if it
 will watch their labels each week as
 type will get mixed despite all efforts.

The C.P.R. in its efforts after "eco-
 nomy" might add to its revenue and render
 an obligation on a large section of the
 community if it took a hint from the
 state railways of Switzerland. It is said
 that official notice has been posted to
 the effect that ladies' hats measuring
 more than 21 1/4 inches in diameter, will
 henceforth be considered as wheels.
 Any lady wearing a hat of larger dimen-
 sions who desires to travel by a Swiss
 passenger train, must either ride in the
 baggage car or deposit her hat with the
 baggage master and ride in the passen-
 ger car unharmed.
